EDUCATION

University of Rochester ,

Rochester, NY

Bachelor of Science, Computer Science & Minor in Mathematics

May 2027

- First Generation Scholar, Bausch & Lomb Science Award
- Relevant Computer Science Courses: Data Structures and Algorithms, Introduction to CS, Artificial Intelligence, Computer Organization, Computer Models, Computation & Formal Systems, AR/VR Development, Mobile App Development (Android)
- Relevant Mathematics Courses: Calculus I & II, Multivariable Calculus, Linear Algebra & Differential Equations, Discrete Math, Intro to Probability

EXPERIENCE

University of Rochester Goergen Athletic Center

Rochester, NY

Lifeguard

October 2023 – Present

- Monitored the safety of 25+ swimmers per shift, enforcing all facility and safety regulations.
- Completed 30+ hours of certified lifeguard and emergency response training every year to maintain readiness and compliance.
- Responded to and managed potential safety incidents, ensuring a consistently secure pool environment.

Penn Yan Central School District

Penn Yan, NY

Substitute Teacher

May 2024 – Present

- Led classrooms of up to 20 students across grades PreK–5, maintaining order and continuity in instruction during teacher absences.
- Learned and utilized specialized communication software, TouchChat, to support students with special needs, facilitating engagement and participation in classroom activities.
- Adapted to different subjects and lesson plans on short notice, ensuring smooth transitions and consistent learning outcomes.

PROJECTS

MotionCraft AR (Lens Studio)

- Developing an augmented reality application for Snap Spectacles targeting K–2 students to support fine motor skill development through interactive hand-tracking exercises.
- Built in Lens Studio (TypeScript) with a React teacher dashboard for real-time progress monitoring; follows FERPA-compliant anonymized data practices.

Android Mobile Applications (Android Studio, GitHub)

- Built two complete Android apps, a 2048 clone and a Monty Hall probability game, using MVVM architecture, ViewModel + StateFlow, and Gson for data persistence.
- Implemented features including undo support, animated win overlays, card flip animations, and a balance/betting system across both projects

Portfolio Website

joe-droney.github.io

- Designed and developed a personal portfolio website using React, HTML, and CSS, showcasing academic projects and professional experience.
- Deployed via GitHub Pages, integrating version control with Git for continuous updates and maintenance.

CAMPUS LEADERSHIP ACTIVITIES

University of Rochester, Delta Kappa Epsilon

Rochester, NY

Vice President , Recruitment Chair

January 2025 – Present

- Coordinated chapter event registration and end-to-end logistics for social, philanthropic, and alumni functions, ensuring 100% compliance with university and national fraternity policies.
- Cultivated alumni relationships with over 30 alumni and managed outreach initiatives that connected brothers with internship, networking, and mentorship opportunities, strengthening chapter engagement and professional development.

SKILLS
